The caller stated it sounds like someone is loading up lumber or doing construction. The caller stated when they turned the light on to let the dog out everything stopped and they could hear voices. The caller stated they can also see kids at this intersection right now looks like there's about 6 walking more into the subdivision. The caller called back and stated that the kids look like they're walking towards the park area at Burr and 67th

\* **SUSPICIOUS PERSON** – Buckingham Ln. - I responded to the above area for a black male on a bike going door to door and asking if people want massages. Upon arrival I located and spoke with the male who stated that he owns an at home massage company and had just moved to the area and was advertising. I advised the male that people were calling about him and he stated he was not knocking on the door, but just leaving his card in the door. The male was advised to not go to the door and was released from the scene.

\* **SUSPICIOUS PERSON** – Manchester Ln., I responded to Manchester Ln, for a male opening mail boxes and it was unclear if he was leaving items or taking them. I recognized the description given to be the same male as an earlier incident in the same area. I spoke with the male again and advised that we received calls about him again, and that interfering with the mail or mail boxes was a federal offense. The male understood and stated he would go home and not advertise in the neighborhood anymore.

\* **SUSPICIOUS INCIDENT** – Novo Selo - Report of a suspicious vehicle in front of the above vacant residence. The complainant, a local resident, advised of a older model, blue, Dodge Durango that parks in front of the above for sale home. The driver/occupants get out of the vehicle and walk up the driveway toward the garage where the complainant loses sight of them. The complainant was worried that they are doing illegal activity in either the garage or yard.

All smoke detectors shall be hard wired into the building's electrical system. All such devices shall be installed in conformity with manufacturer's requirements or acceptable trades union requirements or as directed by the Town's electrical inspector or the Town's fire chief or their designee.

b. These devices shall be installed at intervals in such rooms, corridors, or other spaces within a building so that the entire building shall be secured, protected, or covered. No occupancy permit may be issued by the Town until this ordinance is fully complied with regardless when a building permit was issued.

c. The following list are the categories for which smoke detectors shall be installed as aforementioned:

1. All Hotels and Motels
2. All Businesses
3. All Commercial Buildings
4. All Residential Buildings
5. All Apartments and Condominiums

d. All existing hotels and motels, businesses, commercial buildings, apartments, and condominiums contracted prior to the date of adoption of this ordinance shall also have stalled smoke detectors by or before January 1, 1991. The smoke detectors installed in existing structures may be battery operated. If a battery operated detector is installed, it must contain a tamper resistant cover to protect the batteries. The batteries shall be periodically replaced and maintained so that the detector is always operational. It is the responsibility of the owner of the real estate and the occupier of the real estate or premises to maintain any smoke detector in workable condition.

e. These smoke detectors installed in already constructed buildings or structures shall conform in every way to the requirements of smoke detectors in new construction except they may be battery operated.
